

Crawfish Families,

Each day we work to get better as an organization. We are committed to the task of club development: to educate members, put policies in place, and empower our membership to create the best possible environment.

One of the ways we want to grow as an organization is for Crawfish Aquatics to receive the designation of a Safe Sport Recognition Programs certificate holder. The key aspect to the success of the Safe Sport program is for every member to be vigilant and aware of suspicious activity that might be a violation of our Code of Conduct. The goal of USA Swimming Safe Sport education program is to provide education to the membership that help promote and maintain a safe environment.

In order to be successful, it will require your active participation.

To receive this designation, we need your help as parents and athletes. We are requesting that parents and athletes 12+ years take the online training offered by USA Swimming that outlines the Safe Sport program. *Of course, this is up to each individual family to decide if the parents only, or both athlete and parents, or neither want to take the online course. We respect your decision to participate or to decline.*

As an organization we always welcome and value your feedback, guidance, and involvement. We have created a Safe Sport webpage that will be updated as USA Swimming provides more Safe Sport resources. Links and steps to complete the Safe Sport Online Course are available on the website: <http://www.crawfishaquatics.com/swim-team/safe-sport/>

Thank you,

Crawfish Aquatics Staff
