Crawfish Aquatics Competitive Swim Team Programs-

Crawfish Aquatics offers training and practice groups for swimmers of all ages and ability levels. Our goal is to offer age-specific and ability-specific training that challenges and develops each swimmer to the best of his or her abilities. The primary focus for all of our age group programs is long term athletic development.

Our swim team program is a year-round program of controlled competitive progression from novice through senior-level swimming, divided into **4 Divisions: 8 & Under, Age Group Development, Junior and Senior.** Our Developmental Competitive Track groups (8 & Under, Age Group Development) offers practice groups for entry to intermediate level swimmers. Advanced Competitive Track groups (Junior and Senior) are for experienced swimmers moving beyond the Developmental Competitive track and is per coaches placement.

Practice Groups maintain a low swimmer to coach ratio and focus on basic to advanced stroke technique skills. Practice time will be dedicated to skill improvement, drills, aerobic development, knowledge of competitive rules and fun. Swimmers will also gain greater competitive experience, learn about racing, and become more aware of swimming times and goals.
